

SILVERBACK LAWNS™

Australia's toughest and most realistic
Synthetic Lawn Made for Pets, Kids and Commercial areas

-  A combination of Coolplus Yarn Technology and the texturisation of the yarn, has a noticeable effect on how hot the grass feels, making Silverback Lawn our COOLEST synthetic turf.
-  100% Australian made with an industry leading Life time warranty and AS/NZ ISO 9001:2008 certified.
-  It is the most natural looking lawn ever! Its fully textured yarn removes the 'shine' effect. Silverback gives a perfect Matt Finish.
-  Silverback Lawn has 250 micron thick fibre, making it suitable for FIFA approved systems and commercial areas.
-  Triple backing means extra strength for pet, children and high traffic areas.
-  Extra drainage means easy cleaning and safer area.
-  Affordable with a great return on your investment.
-  Silverback Lawns unique texturised yarn resists flattening. It has mono -filament fibres that are already heat texturised. This allows it to lock in the unique random appearance while also making sure that it does not have that flattened appearance that has dogged synthetic turf for years.
-  High density construction provides robust yet comfortable support underfoot and assists greatly with pet clean up and removal of unwanted debris like leaves, gumnuts and pet waste.
-  Clean and safe Polymers means there are no contaminants to cause ongoing reactions and failure of the yarn. 100% lead free.
-  Use in conjunction with P-OFF Infill For Pets for an odor free, cooler lawn.

P-OFF™ INFILL FOR PETS

P-OFF™ Infill For Pets simply the best odor control for synthetic turf

We all love our pets and want them to be able to enjoy our shared space but ammonia produced by pet urine can cause your synthetic turf to smell, this has put some people off from installing artificial grass. All Seasons Synthetic Turfs P-OFF Infill For Pets, when installed on top of your new lawn as an infill, will prevent the ammonia turning into gas which can produce a nasty odor.

Smell Fresher - Stay Cleaner - Feel Cooler

Pet urine can build up in the sand infill and underneath in the cracker dust base, over time causing the gas from the ammonia to release in to the air and produce the strong smell of urine, if untreated.

The P-OFF Infill For Pets will absorb the urine on contact, which means the ammonia will be absorbed and reduce build up in the synthetic turf backing, sand infill or base material.

P-OFF Infill For Pets absorbs and slowly releases moisture, so when hydrated will reduce the surface temperature of your lawn over a few days until re-hydrated.

P-OFF™ INFILL FOR PETS

Neutralizes Pet Urine and Keeps Your Lawn Cooler

WITH P-OFF™ INFILL

Pet urine is absorbed by the P-off™ Infill and odours are substantially neutralised

P-OFF™ Powered by ProVet Logic professional

Bio enzymatic Synthetic Pet Turf & Floor Cleaner, Deodorizer & Drain Maintainer

- 🐾 Economic, easy to apply concentrated Bio-Enzyme
- 🐾 Simple application using spray gun or pump spray, leave for 3-5 minutes then rinse thoroughly
- 🐾 Controls toxic ammonia
