ASGW HISTORY

All Seasons Green Walls (ASGW) is a leading provider of high-quality artificial green walls, designed to bring lush, vibrant greenery to any space without the hassle of on-going maintenance. Founded in 2009, we offer premium products for purchase through our website, ensuring a convenient shopping experience for customers. Additionally, we have physical locations in Port Kennedy WA, Wangara WA, and Braeside VIC, where customers can view and feel our entire range in person. Whether you're looking for residential, commercial, or general decorative purposes, ASGW is committed to transforming spaces with realistic, sustainable greenery that thrives year-round with the highest grade of UV protection.

FAQ

Are your green walls easy to assemble?

Yes! Our range of green walls are very easy to assemble to a wide range of areas. We have a step-by-step setup guide on our website. We also recommend using a staple gun for a more secure finish.

What are the benefits of artificial green walls?

Artificial green walls offer many benefits, including year-round greenery, zero maintenance, durability, and the ability to transform any space with a vibrant, natural look. They are ideal for locations where living plants may not thrive due to low light or harsh climates.

Are artificial green walls environmentally friendly?

Yes, our artificial green walls are designed with sustainability in mind. While they do not require water or soil, they provide aesthetic and environmental benefits such as enhancing the overall look of your space and promoting better air quality.

Can your green walls be used indoors & outdoors?

Yes, our artificial green walls are suitable for both indoor and outdoor applications. Our green walls are made with UV-resistant materials to withstand the elements, whilst also offering a clean, vibrant look without the need for plant care.
